Write a program to find frequency of words in a text

In [3]:
```python
file=open("C:\\Users\\hp\\Desktop\\Good Morning.txt","r+")

wordcount={}

for word in file.read().split():
    if word not in wordcount:
        wordcount[word] = 1
    else:
        wordcount[word] += 1

for k,v in wordcount.items():
    print(k, v)
```

```
Good 1
Morning 1
How 1
are 2
you 2
Hope 1
fine 1
I 1
had 1
a 1
good 1
day 1
today 1
```
